

Compliant data storage and long-term archiving

- ✓ GDPR certification
- ✓ Data integrity
- ✓ Hardware independence
- ✓ Long-term security

iCAS offers:

A secure and KPMG-certified storage platform for personal and business data (Privacy-by-design)

Integrity protection of your data thanks to patented Content Storage Container and Self-Healing

Encryption, multi-tenancy capability, WORM storage and access control for effective data protection

A central archive storage platform as key to compliance

„Many requirements of the GDPR are easier to implement based on a central archive storage platform. First, the GDPR requires a review and optimization of existing business processes. Technology is only the second step, but it can be crucial for the implementation and continuous compliance.“

IT compliance and privacy

GDPR-compliant data storage with iCAS

- ✓ **Certified privacy**
iCAS is audited and certified by KPMG for Privacy-by-design and Privacy-by-default. Data encryption prevents unauthorized access to your data.
- ✓ **Future-proof archiving strategy**
As a software-defined solution, iCAS is independent of utilized storage hardware and allows you to keep up with state-of-the-art technology. This creates long-term security and investment protection.
- ✓ **Immutability of data**
Thanks to WORM functionality and patented Content Storage Container technology, data is protected against manipulation and unauthorized deletion.
- ✓ **Integration of 120+ business applications**
Leading ECM-, ERP-, DMS-, PACS- and E-Mail-systems are iCAS-certified.
- ✓ **Data integrity**
Data consistency and integrity is ensured through automatic Self-Healing (identification and repair of damaged archive objects).
- ✓ **Multi-tenancy capability and access control**
The division of archives by client offers a clear separation into different repositories. All access attempts to the data archive are documented in audit logs.
- ✓ **Retention Management**
Timestamps and lock concept guarantee a secure data retention to meet legal requirements and internal compliance demands.
- ✓ **Central data storage**
Many requirements of the GDPR are easier to implement based on a central archive storage platform with retention management.
