

HPE and iTernity

HPE 3PAR StoreServ, Apollo Servers & iTernity Compliant Archive Software

Working together. Accelerating results.

A new style of partnering

Hewlett Packard Enterprise and iTernity are collaborating in a fresh new way to bring increased value to customers like you.

We know that acquiring technology is only the first step in achieving a business goal. The technology pieces need to work together. They need to be tested. They need to provide rich functionality, quickly and effectively, so you can concentrate on your business needs.

To help satisfy these needs, iTernity is a member of the HPE Partner Ready for Technology Partner program, an industry-leading approach to supply sophisticated integrated technologies in a simple, confident, and efficient manner.

iTernity has access to the right tools, processes, and resources to help our joint customers accelerate innovation and transformation that brings value, achieves business needs, and increases revenue and market share.

Product overviews

iTernity Compliant Archive Software (iCAS):

iCAS is a storage middleware that enables compliant archiving by protecting against silent data corruption, securing long-term data integrity and availability. iCAS is certified for 100+ business applications and can be used as the central platform for risk reduction in various use cases. Combined with HPE Storage, iCAS provides an open, flexible, and highly

Product Brochure

scalable long-term archiving solution for securing and protecting any business data. The solution offers compliant storage for the fulfillment of many regulatory requirements (SOX, GDPR, SEC 17a-4, MIFID II, HIPAA etc.) and enables simplified and cost-effective archiving. iCAS is certified for the HPE 3PAR Storage and HPE Server portfolios (ProLiant, Apollo), to provide integrated and validated solutions. Customers worldwide, from mid-size businesses to huge international enterprises, entrust their data to iTernity solutions.

HPE 3PAR StoreServ: HPE delivers flash performance and efficiency to organizations of all sizes via the industry's strongest portfolio of all-flash, adaptive flash, and hybrid flash arrays: The HPE 3PAR StoreServ family modernizes your data center to instantly handle unpredictable workloads with 99.9999% data availability. Get rapid and automated provisioning, multi-tenant design, hardware-accelerated deduplication and compression, and sub-1ms latency—all within a single tier-1 storage architecture that starts small and scales big. HPE 3PAR StoreServ can scale from mid-size to the largest enterprises and service providers, for instant application provisioning and high levels of service, at a fraction of the cost.

HPE Apollo 4200 servers: HPE Apollo 4200 servers enable critical data archiving solutions such as iCAS to run on a single platform. Tailored to the unique needs of enterprise-level petabyte storage requirements, Apollo 4000 Systems provide exceptional reliability, manage mixed storage workloads with high performance, are flexible for scaling out, and are simple to adopt—with rack-scale design based on your archive storage capacity needs. The HPE Apollo 4200 Gen9 Server offers revolutionary storage density in a 2U form factor, with more than double the storage capacity of competitors. For data intensive workloads such as compliant archiving, the HPE Apollo 4200 Gen9 Server allows economy of valuable data center space.

Company overview

About iTernity

iTernity is a leading software vendor for highly scalable archiving solutions that enable hardware independent and compliant management of application data. Software-defined storage for audit-proof, long-term archiving and data integrity is the company focus. iTernity is committed to stringent quality requirements and has high standards of efficiency and customer

satisfaction. Since 2008, a strategic technology partnership with Hewlett Packard Enterprise exists, which focuses on the development and sales of complementary solutions for various archiving needs. This enables archiving projects starting from TB up to PB range with the best suitable infrastructure. Together with HPE more than 900 projects have already been realized worldwide. The cooperation of iTernity with numerous ISVs (Independent Software Vendors) has resulted in certifications for more than 100 applications. The constant maintenance of this ISV ecosystem, combined with legal certifications and audits (KPMG), are important cornerstones for the corporate success of iTernity.

About Hewlett Packard Enterprise

Hewlett Packard Enterprise is an industry-leading technology company that enables customers to go further, faster. With the industry's most comprehensive portfolio, spanning the cloud to the data center to workplace applications, our technology and services help customers around the world make IT more efficient, more productive, and more secure.
