PROTECT WHAT MATTERS MOST - YOUR DATA

iCAS is a flexible middleware for retention management & WORM storage. The solution integrates perfectly into heterogeneous infrastructure landscapes. While you take care of your core business, iCAS reliably protects the integrity and availability of your data in the background.

HARDWARE INDEPENDENT

The archive intelligence is tied to the software-layer, not to the hardware

COMPLIANT

iCAS assures regulatory and compliance requirements

FLEXIBLE

Middleware between your business application and the storage infrastructure

TAMPER- PROOF

iCAS provides WORM storage, encryption and retention management

DATA ARCHIVING MADE SIMPLE

Auditing reliability and compliance for business data

120+ validated business applications (DMS, ECM, ERP, PACS, KIS, Email)

Supporting DAS-, NAS-, SAN-, object- and cloud-storage targets

Certified for EU-GDPR, GoBD, GeBüV and SEC 17a-4

Automatic Self-Healing to protect data integrity

Scalable from Terabyte to Petabyte

Low overall costs and transparent licensing model

Strong partnerships and purchase via the global HPE pricelist possible

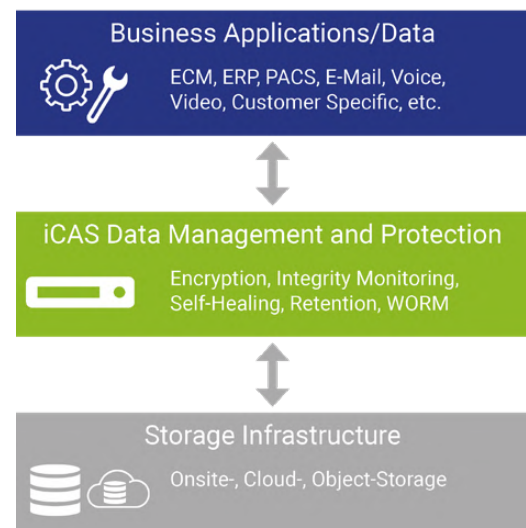

FLEXIBLE, FUTURE-PROOF AND COST-EFFICIENT

As a software-defined solution, iCAS lays the foundation for audit-proof data archiving and protects your investments in hardware, software and services.

iCAS connects your business applications with the storage infrastructure and is independent of both sides. The software solution runs on Windows Server and can be implemented on a physical or virtual server.

iCAS is based on standard hardware and can be used with on-premises, object or cloud storage solutions (S3 interface) and ensures compliance, data integrity protection and WORM storage (Write Once Read Many).

Data migrations to other or future storage infrastructures can be managed in an easy and cost-efficient way – even during running business operations.
