

Protect what matters most – YOUR DATA

Highest security for your data archive

iTernity iCAS is a premium software for secure data storage and long-term archiving. It helps fulfill legal requirements and compliance demands and thus minimizes your business risks significantly. More than 1200 customers worldwide rely on iCAS!

iCAS acts as a central platform between your applications (ECM, DMS, ERP, E-Mail, customer-specific systems) and the storage infrastructure – regardless of the hardware in use. In this way, iCAS ensures long-term data integrity and availability, even if storage technologies and applications change in the future. As a software-defined solution, iCAS lays the foundation for your data archiving – flexible, future-proof and cost efficient!

Data Integrity

- Risk reduction
- Data replication and Self-Healing
- WORM storage

Compliance

- Privacy-by-design
- Certifications for GDPR, SEC 17a-4, HIPPA, SOX
- AES-256 encryption

Integration

- Simple data migration
- Validated for 120+ business applications
- Hardware-independent

Flexibility

- Software-defined archiving without hardware lock-in
- Scale-out into the PB range
- Supports onsite, hybrid and cloud storage

Long-term Security

- Adaptable to future needs
- Easy adjustment of capacity and performance
- Based on industry standards

Cost Efficiency

- 50% cost reduction compared to hardware silos
- Licences are transferable transparently
