

Protect what matters most – Your Data!

- Software-defined archiving platform meets highest security standards
- Data replication, encryption and automated integrity checks
- Support of DAS, NAS, SAN, object and cloud storage
- WORM archiving independent of utilized storage hardware
- Certified for EU-GDPR, SEC 17a-4, HIPAA, SOX
- Optimal integration into heterogeneous infrastructure landscapes
- Easy data migration due to patented CSC technology
- Validated for 120+ business applications (ERP, ECM, DMS, PACS, E-Mail etc.)

Highest security for your data archive

Software-Defined Archiving

iCAS redefines audit-proof data storage and long-term archiving. The solution acts as a software layer between the business applications and your storage infrastructure – independent of the utilized hardware.

- Can be implemented on a physical or virtual server
- Runs on Windows Server 2012 R2 and Windows Server 2016
- Highly scalable and adaptable to changing needs
- Offers WORM storage independent of utilized hardware
- Encrypts data using AES 256 bit encryption
- Provides retention management and self-healing for data compliance

Integration and migration

Leading ECM-, ERP-, DMS-, PACS- and E-Mail-systems are iCAS-certified. This robust ecosystem enables a central, secure archiving platform, regardless of future system changes.

- Validated for 120+ business applications
- Connection via API or filesystem interface
- Migrations and storage changes are easily managed, thanks to the patented Content Storage Container (CSC) file technology

Future-proof storage with iTernity iCAS

Flexible

- No hardware lock-in
- Multi-tenancy capability
- Scale-out into the PB range

Secure

- Data replication
- Self-healing
- WORM storage

Proven

- 1200+ customers worldwide
- Certified software solution
- Strong partner network
