PROFESSIONALIZE YOUR DELETION CONCEPT

The Special Delete Manager for iCAS Classic allows you to seamlessly integrate structured, GDPR-compliant data deletion into your archiving strategy without introducing any additional complexity.

SIMPLE

Intuitive operation,
clearly defined processes –
no training required.

CONTROLLED

Complete transparency:
gapless documentation
of all deletion activities.

TIME-SAVING

Automated workflows
instead of manual
processes.

SECURE

GDPR-compliant deletion
even before the retention
period expires.

YOUR RESULT

Maximum security, clear lines of responsibility and complete compliance.

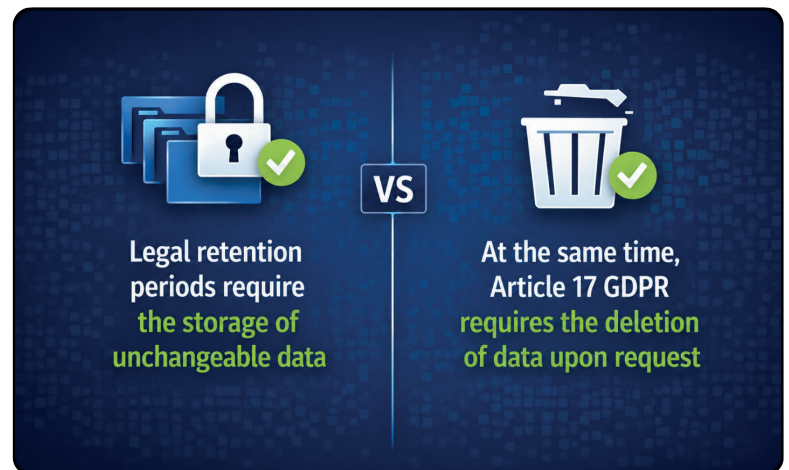

Get started now and schedule a no-obligation consultation with
our experts!

01

THE CONFLICT

Implementing the GDPR – and with it, the ‘right to be forgotten’ – creates a conflict of objectives for companies. For many organisations, reliably and efficiently addressing these conflicting requirements is a major challenge.

02

THE SOLUTION

The iTernity Special Delete Manager for iCAS Classic allows you to delete archived data in a targeted and legally compliant way, even before the retention period expires. This allows you to securely and transparently meet legal requirements without unnecessary effort.

 EFFICIENT WORKING	 CONTROLLED RETENTION
■ Easy and secure deletion of data within the retention period	■ Every deletion activity is comprehensively documented in the audit log
■ Intuitive user interface for independent administration	■ All processes are traceable at any time
■ No complex additional processes required	■ Transparency across the entire deletion process

03

THE PROCESS

The Special Delete Manager is designed for particularly sensitive processes and is based on a clearly defined role model. The requester submits a deletion request, which the authoriser then reviews and approves. Automated deletion in the iCAS Classic system only takes place after authorisation.

YOUR ADDITIONAL VALUE

SAVE COSTS

GDPR-compliant deletions can be carried out independently, without the need for tickets or mandatory deletion services.

FREE UP STORAGE SPACE

Unlike many proprietary archiving solutions, deleted data is removed from the iCAS archive and the released storage space is freed up again.

RELIABLY HANDLE SPECIAL CASES

Even special cases, such as the deletion of data created due to migration errors, can be reliably mapped in a secure, controlled and legally compliant manner.
